Dhia Bejaoui
Software Engineer
Tunis, Tunisia | +216 21 626 335 | dhia.bejaoui.db@gmail.com
dhiabejaoui.com | github.com/dhiabj

Skills

Languages: TypeScript, JavaScript, Python, PHP
Back-end: Node.js, NestJS, Express, FastAPI, Symfony
Databases: PostgreSQL, MongoDB, MySQL, Firebase
Testing: Vitest, Playwright, Jest, Detox
Front-end: React, Next.js, React Native, Expo, Vue.js, Tailwind CSS, Storybook, TanStack Query, Redux
DevOps & Tools: Docker, GitHub Actions, Git, Claude Code, MCP

Experience

Software Engineer | *Sparkling Co. Ltd – Remote, London* *July 2025 – July 2026*
- Cut API response times by 30% after reworking the back-end services in NestJS
- Integrated Stripe subscriptions and invoicing, handling payment events through webhooks
- Built reusable UI components (Next.js, Tailwind CSS, Untitled UI) and type-safe forms (React Hook Form, Zod)
- Wrote unit tests in Vitest and end-to-end tests in Playwright
- Set up Storybook to document the component library, with Chromatic visual regression checks in CI
- Developed a Claude Code plugin connecting 5 MCP servers (Figma, Linear, Context7, Playwright, Codegraph) with code review, security and accessibility audit skills, then used it to ship the company website in under 1 week
- **Tools**: Next.js, Redux, NestJS, Express, TypeScript, PostgreSQL, MySQL, Tailwind CSS, Stripe, Vitest, Playwright

Software Engineer – Internship | *Sparkling Co. Ltd – Remote, London* *February 2024 – July 2024*
- Turned Figma designs into React Native screens with Tamagui, including forms validated with Formik and Yup
- Added a chat feature with voice messages and reactions, stored in Firebase Storage
- Implemented live user location tracking on Google Maps with Expo Location
- Covered new features with Jest unit tests and Detox end-to-end tests
- **Tools**: React Native, Expo, Redux, Tamagui, Firebase, Google Maps API, Jest, Detox

Front-end Developer – Internship | *Front Row – Remote, Hamburg* *July 2023 – August 2023*
- Converted Marvel App designs into the company client portal in React
- Moved the portal data fetching to TanStack Query and made the layout responsive with Tailwind CSS
- **Tools**: React, Redux, Tailwind CSS, TanStack Query

Full Stack Developer – Internship | *Financial Market Council (CMF) – On-site, Tunis* *February 2021 – May 2021*
- Migrated a legacy market monitoring application to a Symfony and React web app
- Built interactive market data charts with React, Bootstrap and Chart.js
- Added CSV upload for trading reports, with parsing, validation and persistence through Doctrine ORM
- **Tools**: React, Redux, Bootstrap, Chart.js, Symfony, Doctrine

Education

ESPRIT — **Engineering Degree in Computer Science** — *December 2024*
ISSATM — **Applied Bachelor's Degree in Computer Systems** — *July 2021*

Projects

Sarrafli | *Next.js, FastAPI, MongoDB, Docker* *sarrafli.net*
- Built a web app tracking live exchange rates from 13 Tunisian banks and the Central Bank of Tunisia (BCT), in French, English and Arabic (RTL)
- Scheduled async scrapers with APScheduler, with automatic retries and email alerts on failure
- Deployed to a VPS with Docker Compose through a GitHub Actions pipeline

CodeSensei | *Vue.js, NestJS, Google Gemini API* *github.com/dhiabj/CodeSensei*
- Created a Gemini-backed code review app with a multi-language CodeMirror 6 editor
- Added Google and GitHub sign-in with Passport.js and JWT, and email verification through Brevo

Certifications

Anthropic | *Claude Code 101, Claude Code in Action, Introduction to Subagents, Introduction to Agent Skills* *2026*

Languages

Arabic — *Native* | **English** — *Fluent* | **French** — *Conversational*
